Title : Low Voltage Electrical Cables of Rated Voltages up to and including 450/750 V with Cross-Linked Polyethylene (XLPE) or Polyvinylchloride (PVC) Insulation and Polyvinylchloride (PVC) Sheath. Requirements for Design and Operation Characteristics
Scope : This national standard specifies the special requirements for cross-linked polyethylene (XLPE) or polyvinyl chloride (PVC) insulated and polyvinyl chloride sheathed cables with copper conductors for fixed wiring that are intended to be used in low voltage private and commercial installations, with voltages up to 450/750 V. All the cables described in this standard shall by applicability be in accordance with the general requirements given in EN 50525-1 and the special requirements of this standard. The constructional requirements and testing methods of insulation and sheath for the cables described in this standard are set in accordance with local climatic environment.

Title : Guidelines for periodic verification of electrical installations at homes.
Scope : This report is intended to provide a guide for the verification and inspection of electrical installations in homes:
- Providing a methodology for verification / inspection; and
- Providing documentation for the registration of conditions and values of verification / inspection (observed non-conformities, damage, deterioration and hazardous conditions, etc.)
The results of the verifications / inspections have to define the corrective actions to be performed to comply with the minimum safety requirements corresponding to each type of installation.
This report is applicable to the verifications prior to the commissioning of the installation and inspections, regulations and voluntary, initial and periodic.
It also applies to all verifications carried out during the execution and finalisation of the installation by the designer, installer and / or construction manager.
This report applies to all indoor electrical installations of homes excluding installations in common areas of residential buildings.
The dwellings may include special purpose installations whose electrical installations are affected by particular ITC-BT (for example: outdoor lighting, bathrooms, swimming pools, outdoor installations, circuits for the charging of electric vehicles, etc.). For these facilities, the corresponding UNE Reports should also be used and applied, where applicable, the most restrictive requirements.
